

KEYWORDS — the only source of search truth

Two live Semrush pulls (US database), both **6 Aug 2026** — the last before the subscription ends. Every number here was verified against the live API before saving; the two pulls agreed on every overlapping term. **Do not delete this file. This file is final** — no re-running research, no fresh volumes, no estimating numbers that aren't here.

Tags:

- **Build** — write for it (script, title, page, caption). The tag already weighs volume, difficulty, intent, and whether the app can honestly answer. A "(video)" note means social/YouTube first — the SERP is too hard for a page but nothing stops a face-to-camera video.
- **Too hard** — real demand, but a one-person site won't rank a page; no note means don't chase it in any format yet.
- **Skip** — wrong intent, someone else's brand, or something the app can't honestly claim. Volume never overrides a Skip.

Vol = US searches/month. KD = difficulty 0–100 (under 40 = winnable for a new site). Blank KD = Semrush had no score (usually tiny volume).

THE SEVEN TRACKED IN SEMRUSH (set 10 Aug 2026)

Position Tracking is capped at seven keywords on the free plan, so these seven are the whole search scoreboard. They are all Lane 1, all difficulty **27 or under, **and together they are about 1,420 searches a month**.**

Keyword	Vol	KD
loving an alcoholic	170	5
is my husband an alcoholic	260	8
how to help an alcoholic spouse	260	20
my husband drinks too much	90	20
my boyfriend is an alcoholic	110	22
how to help an alcoholic husband	210	23
living with an alcoholic husband	320	27

Why these and not the obvious ones. The first tracking run, set 8 Aug, used broad terms and returned zero across the board — with samhsa.gov, Wikipedia and drugs.com holding the top of every SERP. Those results are not hard, they are

closed: Google fills health queries with institutional sources, and a one-person site does not displace a government agency. Two of the seven slots were so broad they were pulling Shutterstock and Pornhub as "competitors", which is a tracking slot doing nothing at all.

Nobody institutional writes for the person who *loves* an addict. That is why Lane 1 is winnable and the head terms are not, and it is the same audience outperforming everything else on TikTok and Facebook.

Watch is my husband an alcoholic **first** — difficulty 8 and the page is already live.

Do not check this weekly. Search moves over six to twelve months. Set it, record it here, and look again in the winter.

THE COPY RULE (site-wide, every page, every video)

The app is for ****everyone** — straight, gay, bi, gender-nonconforming, every gender — **and the supporter is not always a wife. So: headers say** "your partner / the person you love"; every supporter page names husband, wife, boyfriend, girlfriend explicitly at least once so every reader sees themselves. No competitor does this — every recovery app assumes a straight man. It's lane #2 of the moat, and the cluster data below proves it's also free traffic.

Lane 1 — The partner of someone who drinks (THE lead lane)

Low difficulty across the whole cluster, exactly who the app is for.

Term	Vol	KD	Tag	Why
how to deal with an alcoholic husband	480	—	Build	Biggest phrasing of the core question
how to treat an alcoholic husband	390	—	Build	Same cluster
living with an alcoholic husband	320	27	Build	High intent, low KD
is my husband an alcoholic	260	8	Build	Page live — KD 8 is a gift
married to an alcoholic	260	25	Build	
how to cope with an alcoholic husband	260	—	Build	

how to help an alcoholic spouse	260	20	Build	Second-easiest way into the cluster
how to help an alcoholic husband	210	23	Build	
how to talk to an alcoholic	210	37	Build	
loving an alcoholic	170	5	Build	KD 5 — easiest alcohol term in the file
how to live with an alcoholic husband	170	—	Build	
when to give up on an alcoholic husband	170	—	Build	Painful, honest — strong video title
wife of an alcoholic	140	29	Build	
husband drinks too much	110	28	Build	
my boyfriend is an alcoholic	110	22	Build	Inclusive cluster — same page
enabling an alcoholic	90	34	Build	Careful tone — support, never blame
my husband drinks too much	90	20	Build	
my wife is an alcoholic	90	16	Build	Inclusive cluster — same page
my husband drinks every night	70	13	Build	
my partner drinks too much	70	19	Build	"Partner" catches everyone
my boyfriend drinks too much	40	25	Build	
how to help someone stop drinking	320	52	Too hard	Health giants own it
functional alcoholic husband	10	—	Skip	No volume
support groups for wives of alcoholics	20	—	Skip	No volume; sends to Al-Anon anyway
al anon alternative	0	—	Skip	Zero volume

Lane 2 — Betrayal trauma & the partner-of-porn (said safely)

How the partner-porn audience searches without saying porn — which is also what makes it platform-safe.

Term	Vol	KD	Tag	Why
betrayal trauma	4,400	42	Build (video)	The moat term — no competitor app serves her. Long-tails below carry the site
betrayal trauma recovery	720	36	Build	Companion page
what is betrayal trauma	320	—	Build	
how to heal from betrayal trauma	170	—	Build	
partner betrayal trauma	90	25	Build	Fold into the betrayal-trauma page; "partner" in the H2s
how to get over betrayal trauma	90	—	Build	
do i have betrayal trauma quiz	30	—	Build	/quiz already exists — free win
husband watches porn	880	51	Build (video)	Core partner query — the tells (glow, closed door), never explicit
husband addicted to porn	260	31	Build	Direct supporter-page traffic
my husband looks at porn	140	49	Build (video)	Same cluster
my boyfriend is addicted to porn	110	6	Build	KD 6 — easiest term in the entire file
wife addicted to porn	70	7	Build	KD 7 — flips the "his problem" framing
my girlfriend watches porn	50	16	Build	Same page

lgbtq addiction recovery	20	—	Build (mention)	No volume, zero competition — one paragraph per supporter page claims it free
porn addiction husband	10	—	Skip	Covered by the above
partner of porn addict	10	—	Skip	No volume

Lane 3 — Quitting drinking (the person themselves)

Term	Vol	KD	Tag	Why
how to stop drinking	4,400	44	Build (video + one long-form page)	Borderline KD — worth one serious page and YouTube, not quick posts
sobriety counter	1,000	39	Build	App IS a day counter
quit drinking app	480	33	Build	Buyer intent
how to quit drinking on your own	480	37	Build	The app's no-meetings promise
stop drinking app	390	32	Build	
sober curious	2,900	59	Too hard	Media own it; lifestyle intent
sober app	1,600	43	Too hard	Brand-dominated SERP
sobriety app	880	53	Too hard	The i-am-sober-alternative page catches this cheaper
alcohol recovery app	40	49	Skip	Tiny and hard

Lane 4 — Porn (his own fight; in the app, never on the sign)

Term	Vol	KD	Tag	Why
how to stop watching porn	8,100	39	Build (video)	Biggest honest term here; expect platform suppression, post anyway

how to quit porn	5,400	64	Too hard	Head-on SERP unwinnable; win via app-intent + community terms
quit porn app	320	38	Build	Core buyer term
nofap app	140	25	Build	Community term, very easy — mention honestly, don't pretend to be it
porn addiction app	320	46	Too hard	Blocker brands own it
porn blocker app	720	45	Skip	The app is NOT a blocker — can't honestly answer

Lane 5 — Food / binge (the Tier-1 anchor)

Term	Vol	KD	Tag	Why
how to stop binge eating	9,900	37	Build	Biggest winnable term in the whole file. Ad-safe lane
compulsive eating help	50	39	Build	Fold into the binge page — not a separate page
binge eating help	590	50	Too hard	
food addiction help	590	50	Too hard	
binge eating recovery	480	54	Too hard	
stop overeating	140	58	Too hard	
food addiction app	10	—	Skip	No volume

Lane 6 — The other tracks

Term	Vol	KD	Tag	Why
how to stop doomscrolling	1,600	24	Build	Big, easy, young audience
how to quit social media	390	29	Build	Social track — cheap win
work addiction	390	38	Build	Competition 0.03 — nearly unclaimed

quit vaping app	390	38	Build	App-intent side of vaping
shopping addiction help	880	41	Build	Best shopping term by volume
how to stop impulse buying	320	39	Build	Same page family
how to stop gaming addiction	210	32	Build	Gaming track — cheap win
anger management app	110	38	Build	App-intent; one video
dopamine detox app	70	30	Build-later	Small, easy, trendy framing
spending addiction	480	48	Build-later	Fold into the shopping page
how to control anger	1,900	48	Build (video only)	SEO page later
how to quit vaping	18,100	58	Too hard	Tempting volume; health giants own it. Revisit at higher authority
how to stop gambling	4,400	59	Too hard	Helplines/gov dominate
quit smoking app	1,300	62	Too hard	
gambling addiction help	1,600	94	Too hard	Also crisis-sensitive — support in-app only
drug addiction help	1,300	93	Too hard	Medical/gov SERP
quit gambling app / social media addiction app / quit gaming addiction	≤30	—	Skip	No volume — pages above catch this traffic

Lane 7 — Competitor & category terms

The play is intercepting brand searches with the -alternative pages — never chasing the brand head term with its own content.

Term	Vol	KD	Tag	Why
quittr	8,100	47	Build (via existing page)	Huge — expand /quittr-app-alternative, already live

i am sober app	2,400	34	Build (via existing page)	Easy KD for the volume — expand /i-am-sober-alternative
reframe app	4,400	51	Build (via existing page)	/reframe-app-alternative ALREADY EXISTS — expand it, don't create a new one
covenant eyes alternative	110	3	Build	KD 3, page live — best pure-SEO bet in the file
brainbuddy	260	10	Build (via existing page)	KD 10 — existing page should rank as-is
addiction recovery app	140	31	Build	Category term, honest fit
i am sober alternative / reframe app alternative / quittr alternative	≤20	—	Build	Pages live — free
best recovery apps	20	—	Build	Page live
accountability partner app	210	22	Skip	/together NOT built — flip to Build the day it ships
best sobriety apps	170	54	Too hard	
covenant eyes	27,100	56	Skip	Navigational — that searcher wants that product
ever accountable	1,900	38	Skip	Navigational
blockerx	1,600	41	Skip	Navigational
fortify app	260	54	Skip	Page exists; don't invest more
sunnyside / loosid / sober time / betblocker / quitnow / nomo	≤480	—	Skip	Navigational, small

Page plan (what actually gets built, in order)

One page per addiction that names everyone — never a page per term; Google ranks one inclusive page for the whole cluster.

1. /partner-watches-porn — the KD 6/7/16 inclusive porn-supporter cluster plus "husband addicted to porn"; links to /for-her.

2. /partner-drinks — the whole alcohol-supporter cluster in one place; merge with or link /when-he-drinks (keep its SEO — redirect, don't delete).

3. how to stop binge eating — the 9,900/mo anchor.

4. betrayal trauma recovery — companion to the moat term.

5. how to stop drinking — the one borderline long-form worth attempting.

Track coverage check (all 13)

Porn ✓ · Alcohol ✓✓ · Smoking ✗ (SERP unwinnable now — users caught by app-intent pages) · Substances ✗ (KD 93, same) · Gambling ✗ (same) · Social media ✓ · Gaming ✓ · Food ✓ (anchor) · Shopping ✓ · Work ✓ · Anger ✓ (app term + video) · Supporting Someone ✓✓✓ (the moat) · Other → dopamine detox. The three ✗ tracks are not skipped as *tracks* — their SERPs are just unwinnable today; those users arrive through the app-intent and supporter pages.

No data

Semrush returned nothing for: **when he drinks**, ****signs of alcoholism in husband, recovery app for couples****. Never quote volume for them. /when-he-drinks stays live regardless — it was built for emotional fit.

How to read this file in one line

Videos: any **Build** term is a title, said the way the term is written.

Pages: follow the page plan above, in order — everything else Build-tagged already has a page or belongs in video.

QUESTION TERMS — pulled live 12 Aug 2026

phrase_questions, US database. These are the actual sentences people type, which is a different list from the terms above and mostly much easier. ****Where a difficulty here disagrees with the tables above, this pull is the newer one**** — Semrush re-scores over time; neither number is wrong, they were taken on different days.

The near-zero ones — nothing to outrank

Question	Vol	KD
----------	-----	----

how can i help my alcoholic husband	40	0
are betrayal trauma and ptsd different	50	0
how long does betrayal trauma last	40	0
do i have betrayal trauma quiz	30	0
what betrayal trauma does to the brain	30	0
does betrayal trauma ever go away	20	0
how do i know if my husband is an alcoholic	50	2
do i have betrayal trauma 26 symptoms	70	7
is my husband alcoholic	70	9
how to deal with betrayal trauma	50	10

Small volumes individually. Together they are roughly **460 searches a month at an average difficulty under 5**, and they are questions this app can answer honestly and most sites answer badly.

The quiz terms — a page that already exists

Question	Vol	KD
do i have a binge eating problem quiz	720	15
is my husband an alcoholic quiz	50	14
do i have betrayal trauma quiz	30	0

/quiz is live. **720 a month at difficulty 15** for a binge-eating quiz is the single best unclaimed thing found in any pull so far — it needs a quiz variant, not a new site.

The "at night" cluster — script 12 already says this

Question	Vol	KD
how to stop binge eating at night	880	33
how to stop binge eating at night time	880	32
how to stop from binge eating at night	720	29
how to recover from a binge eating disorder	1,000	29

About 3,480 searches a month at difficulty 29-33, against the head term

how to stop binge eating at 9,900 and **difficulty 46**. Nearly the same traffic, far easier ground.

And script 12 already opens **"It's the ten minutes after everyone else goes to bed"** — the video was written for this cluster before the cluster was found.

Retitle it to "how to stop binge eating at night".

The husband cluster — how many ways people ask one question

how to deal / treat / cope with / help / handle / live with an alcoholic

husband are six separate terms at 140-390 each, all difficulty 27-29. That is

about 1,500 searches a month for one page, as long as the page uses all six verbs rather than picking one.

ADDENDUM — the two head terms this file missed (pulled live 12 Aug 2026)

The 6 Aug pulls are still final for everything above; nothing there was re-run or changed. But the file only ever contained a `live` alternative (0/mo, Skip), and never the head terms themselves — so the two biggest doors into the partner audience were invisible. Pulled live from Semrush US on 12 Aug 2026 and verified before saving, same rule as the rest of the file.

Term	Vol	KD	Tag	Why
codependency	33,100	72	Too hard (page exists)	Head term. The page targets it; the long tail is what will actually land
codependent	18,100	72	Too hard	Same SERP as above
codependent no more	9,900	43	Skip	Someone else's book
signs of codependency	1,900	64	Build	On /codependency — the signs section is written to it
how to stop being codependent	1,600	46	Build	The winnable heart of the cluster
codependency in relationships	1,300	48	Build	Same page
am i codependent	880	49	Build	Routes to /quiz

codependency test	390	15	Build	Lowest difficulty on the whole site. A dedicated check-in page is the next obvious build
codependency recovery	260	33	Build	Same page
al anon	33,100	68	Too hard	Navigational — they want a meeting, not an app. Never bid on it
alanon	18,100	68	Too hard	Same
al anon meetings	22,200	39	Skip	We cannot honestly answer this; only AI-Anon can
al anon meetings near me	14,800	32	Skip	Same — a page here would be a bait page
what is al anon	3,600	33	Build	Answerable honestly, and CPC \$5.76 says the intent is worth something
al anon online meetings	2,900	26	Build	Mentioned on /what-is-al-anon; the link goes to al-anon.org

The rule this cluster tests: intercepting al anon meetings near me would be easy and dishonest. /what-is-al-anon answers the question and sends people to the real organization — and says on the page that we are not affiliated with them. The app is offered for the six days between meetings, which is a gap the meeting itself does not claim to fill.

FINAL PULL — 12 Aug 2026, before the trial ended

Jacques flagged that the Semrush trial was nearly up, so this is a last sweep for anything the file would be stuck without. Live US pulls, verified before saving. **After this the connector is gone: quote these numbers, do not re-estimate them, and do not assume a term missing from this file is unclaimed — it may simply never have been pulled.**

Three lanes came out of it that the file did not have at all.

■ Lane 8 — "dry drunk". ~11,700/mo at difficulty 30-34, and it is his story

Term	Vol	KD	Tag
what is a dry drunk	2,900	32	Build
alcoholic dry drunk	2,400	32	Build
dry drunk meaning	2,400	31	Build
dry drunk definition	1,600	30	Build
dry drunkenness	1,600	33	Build
dry drunk syndrome	720	34	Build

One page answers all six. Sober and still the same person — stopped the drink, kept the temper, the secrecy, the flatness. It is the single closest match in the whole dataset to what Jacques actually lived through and what the app's lessons are for, and nothing on the site mentions it. ****This is the strongest unbuilt page in this file.****

■ Lane 9 — the grown-up child. A third audience, not a variant of the other two

Everything above serves the drinker or the partner. This is the person who *grew up* in it — and it is winnable in a way the partner terms are not.

Term	Vol	KD	Tag
adult children of alcoholics	8,100	31	Build — head term, and gettable
adults of alcoholics	5,400	33	Build
laundry list / aca laundry list / acoa laundry list	2,400 / 1,600 / 1,300	24 / 16 / 18	Build — ACA's 14 traits, ~6,000/mo combined at very low difficulty
children of alcoholics	1,300	38	Build
adult child syndrome	880	6	Build — near-zero difficulty
adult children of alcoholics and dysfunctional families	480	18	Build
acoa traits	390	20	Build
support groups for families of alcoholics	720	32	Build
aca meetings / acoa meetings / ...near me	6,600 / 4,400 / 2,900	20 / 11 / 21	Skip

The Skip row is the AI-Anon rule again, and it is the biggest test of it in the file: 14,000+ searches a month at difficulty 11-21, which is the cheapest traffic anywhere in this document. We cannot tell somebody where their ACA

meeting is. Catching that search to show them an app instead is a bait page.

Answer the *what is* questions; send the *where is* ones to the real fellowship.

Lane 10 — "what is an alcoholic really like"

Term	Vol	KD	Tag
alcoholic personality	2,400	30	Build
what is an alcoholic personality	1,000	20	Build
alcoholic personality traits	880	28	Build
alcoholics personality	720	27	Build
personality of an alcoholic	720	17	Build
traits of an alcoholic	590	28	Build
what is an alcoholics personality	590	26	Build
alcoholics personality characteristics	590	33	Build
drinker types	1,900	10	Build

~9,400/mo for one page, all difficulty 33 or under, all six phrasings of a single question. **Tone warning:** this is one keystroke from a page that labels people. It has to be written as *"here is what the behaviour looks like from the outside, and why it is not who they are"* — the claims audit applies at full strength, and Jacques's own story is the only safe narrator.

The codependency long tail, now with the easy ones named

Extends the addendum above. Everything here is difficulty 25 or under.

Question	Vol	KD
how to fix codependent relationship	170	8
how to work with a codependent partner	260	9
how to fix codependency in a relationship	140	10
how to fix a codependent relationship	210	13
am i codependent quiz	390	14
what does codependency look like	390	15
why is codependency bad	170	16

is codependency a mental illness	210	20
how to heal from codependency / how to heal codependency	320 / 170	25
how to cure codependency	260	26

am i codependent quiz (390, KD 14) plus codependency test (390, KD 15) is

780/mo of quiz intent at almost no difficulty — the /quiz pattern already

exists, so this is a build, not an invention.

Partner-side terms worth having, all winnable

Term	Vol	KD	Note
trauma bonding	33,100	62	Too hard as a page. Real as video — biggest untapped term for her
living with an alcoholic	1,000	23	Build
how to help an alcoholic spouse	260	20	Build
alcoholic in denial	210	17	Build
walking on eggshells relationship	210	18	Build
loving an alcoholic	170	5	Build — lowest KD on the partner side
detachment with love	140	19	Build — Al-Anon's own phrase
when to leave an alcoholic	110	20	Build, carefully — never advise leaving or staying
setting boundaries with an alcoholic	70	15	Build
enabling vs helping	70	10	Build
nar anon	1,600	51	Skip — same rule as al anon

Self-side odds and ends

Term	Vol	KD	Note
how long does hangxiety last	590	16	Add to the existing /hangxiety page — it already ranks for the head term

is porn cheating	2,900	35	Build (video) — the partner-porn lane, said safely
porn addiction recovery timeline	590	33	Build
relapse prevention plan	3,600	49	Borderline
sober curious	2,900	64	Too hard
alcohol withdrawal timeline	8,100	59	Too hard — and medical. Leave it
how to quit porn	5,400	59	Too hard
90 days sober	390	6	Build — trivially easy
sobriety milestones	140	8	Build
accountability partner app	210	22	Build when /together ships — the deferred feature has a search term waiting
smart recovery vs aa	390	21	Build
aa alternatives	390	27	Build
faith based recovery	110	20	Build — CPC \$11.93 , the highest commercial intent in the file
free sobriety app	260	46	Borderline
sober tracker app	320	45	Borderline

Build order, if the pages get built in the order that pays: dry drunk → adult children of alcoholics → alcoholic personality → the codependency quiz.
That is roughly 30,000 searches a month, all at difficulty the site can reach.
